

Sample career preparation worksheet

Reflect on skills and portfolio evidence without promising placements or employment.

Fictional demonstration content. Not an operational policy, application form, booking or professional advice. The organisation and contact details are examples. Do not send personal documents or payments. A real operator must review and replace this guide before launch.

Describe your contribution

Choose a practice project and explain the question, your contribution and what changed after feedback. Show reasoning and limitations rather than inflating an outcome or claiming work by another person.

Use synthetic examples and remove sensitive information before sharing a portfolio. The demonstration offers no recruiter introductions, placement rates or employer endorsement.

Plan the next conversation

Prepare questions about role expectations, learning opportunities and the evidence an employer would find useful. Confirm any real career service independently.

A completed worksheet is a reflection artifact, not a qualification or a job application. No employment outcome is guaranteed.
